

- Analyze the predicted results of executing the plan.

```
[ceph: root@node /]# ceph balancer eval PLAN_NAME
```

- If you approve of the predicted results, then execute the plan.

```
[ceph: root@node /]# ceph balancer execute PLAN_NAME
```

#### Note

Only execute the plan if you expect it to improve the distribution. The plan is discarded after execution.

Use the `ceph balancer ls` command to show currently recorded plans.

```
[ceph: root@node /]# ceph balancer ls
```

Use the `ceph balancer rm` command to remove a plan.

```
[ceph: root@node /]# ceph balancer rm PLAN_NAME
```
