• Configure the CephFS file system to be mounted on each system startup. Verify that the /etc/
  fstab file is updated accordingly.

Evaluation

Grade your work by running the lab grade comprehensive-review3 command from your
workstation machine. Correct any reported failures and rerun the script until successful.

```
[student@workstation ~]$ lab grade comprehensive-review3
```

Finish

As the student user on the workstation machine, use the lab command to complete this
exercise. This is important to ensure that resources from previous exercises do not impact
upcoming exercises.

```
[student@workstation ~]$ lab finish comprehensive-review3
```

This concludes the lab.
